

CMIS 102 Homework 3 Week 5

Overview of code:

```
1  #include <stdio.h>
2
3  int main ()
4  {
5      int totalMilesTraveled = 0;
6
7      int numberOfTimesTraveled;
8      printf("How many times did you walk or run? \n");
9      scanf("%d", &numberOfTimesTraveled);
10
11     while (totalMilesTraveled < numberOfTimesTraveled)
12     {
13         int milesTraveledThisTime = 0;
14
15         printf("How many miles did you walk or run? \n");
16         scanf("%d", &milesTraveledThisTime);
17
18         totalMilesTraveled += milesTraveledThisTime;
19     }
20
21     printf("Miles walked/ran: %d \n ", totalMilesTraveled);
22     return 0;
23 }
24 }
```

```
How many times did you walk or run?
5
How many miles did you walk or run?
1
How many miles did you walk or run?
2
How many miles did you walk or run?
3
Miles walked/ran: 6
```
